

JULY EDITION 2022

VOLUME 28

Health Education Collaborative Newsletter

A note from the CEO

Bruce Greaves

It has been a busy time on the development side for us. We have been redeveloping the NDS course, which has involved two days of filming and a total restructure of the online program to be more general infection prevention and control rather than just COVID centric. I have also been busy putting the final touches on our suturing course. Marg has developed our PALS, ALS and deteriorating patient programs which we will be launching in the second week of September at an Aboriginal health service in central Australia.

Our fracture management course is being delivered in several states now with many of the courses being private programs for hospital organisations. Sheryn has been hard at work on our Executive Health Program as well.

We will have some exciting news in October about our online program development. Marg and I will be undertaking some training with Open LMS our learning management provider, to create more interactive and exciting courses. We look forward to sharing this with you soon.

We all know that the current state of health care is in crisis at present. In my view there are many areas in desperate need of change. We need a long term strategy, not just a band aid measure. Last week I wrote a letter outlining my concerns and possible solutions to some of the issues to the Minister for health. I will keep you posted when I get a reply.

Education Update

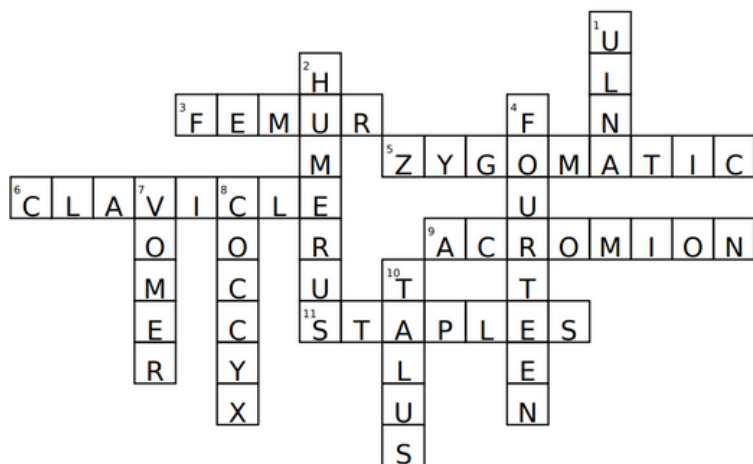

Marg Vilella

The Sepsis Clinical Care Standard was launched via webcast on Thursday, 30 June 2022. The Sepsis Clinical Care Standard ensures that a patient presenting with signs and symptoms of sepsis receives optimal care, from symptom onset through to discharge from hospital and survivorship care. Several resources have been developed to support the implementation of the Sepsis Clinical Care Standard. Click [here](#) to access the Sepsis Clinical Care Standard, view the webcast and access the resources.

Answers to May's newsletter crossword

How many bones do you know?

Down:

1. Is the long bone in the forearm and lies medially and parallel to the radius.
2. The long bone between the shoulder and the elbow.
4. How many phalanges are there?
7. Forms the posterior aspect of the nasal septum.
8. What is the correct name for the tailbone?
10. The posterior half of the foot is formed by seven tarsal bones. What is the most superior bone called?

Across:

3. What is the longest bone in your body?
5. Forms the cheek bones of the face and articulates with the frontal, sphenoid, temporal and maxilla bones.
6. What is the correct name for the collar bone?
9. Fairly flat projection of the scapula that curves around from the back to the front of the shoulder.
11. Smallest bone in the human body.

“Change is the end result of all true learning.”
